**Week 4** – Ground Beef (M,T); Shredded Chicken (W,Th,F)

*Alternate meals at select senior centers only*

All meals served with 8 oz milk and appropriate condiments
Falls are Not a Normal Part of Aging!

Yet, 1 in 4 Utahns aged 65+ fall every year. Falls are the leading cause of fatal and non-fatal injuries for older Americans.

What can you do to prevent a fall?
The National Council on Aging and the CDC suggests 4 things you can do to prevent a fall:

1. Exercise – Participate in a program that will help build balance, strength and flexibility. Check out the EnhanceFitness or other exercise classes at your senior center.

2. Review your medications with your pharmacist. Make sure side effects such as dizziness or drowsiness aren’t increasing your risk of falling. As you get older, the way medicines work in your body can change. Take medications only as prescribed.

3. Get your vision checked annually. Poor vision can increase your chances of falling.

4. Make your home safer. Remove things you can trip on like throw rugs, papers and shoes. Keep items you use often where you can reach them without using a step stool. Use non-slip mats in the bathtub or shower. Improve lighting in your home—especially over the stairs. Install grab bars in your bathroom. Always wear good fitting shoes.
