Client Referral

Consent

Entry Steps: Client Profile, Intake. Additionally, if your agency has a standard set of information that is regularly shared with one or all agencies when making a referral, an Agency Disclosure Agreement(s) should be established prior to initiating client consent.

1. Consents are required before sharing any information about a client with anyone outside the agency. In UWITS, an independent consent/disclosure must be established before information can be shared.

2. Generate the client's Activity List. Click **Consent** from the Left Menu. Existing consents will be listed in the Client Consent List.

3. **Review Existing Consents:** There may be several consents already on record. Click **Review** to review any existing consents. **Note:** make sure there is no active existing consent with the agency you are about to initiate consent with. If a client consent has been revoked, it will be noted in the Status.

4. To initiate client consent, click **Add New Client Consent Record** hyperlink.

If client has signed the paper form select “Yes”. If this is not marked “Yes” the agency you are consenting to will not be able to view the consented data.

Elements selected need to be moved to the **Disclosure Selection** with the arrow buttons. **Note:** an expiration type must be associated with each element of information selected in the consent.

11. Once the Screen is completed click “Save”.

Note: By clicking “Save” the record becomes uneditable and this consent must be revoked and a new consent must be created if any changes need to be made. At this point, information has been disclosed to the other agency.
