

Six Ways to Save Money and Resources

START A NEW CYCLE. RECYCLE.

83% of consumers think companies should accomplish business goals while improving society and the environment.

RECYCLE.SLCO.ORG

Turn off lights and electronics

US organizations waste \$2.8 Billion a year in energy costs by leaving computers on overnight. Not to mention printers, fax machines, copiers and lights.

Bale and sell cardboard

Baled cardboard sells at an average of \$80/ton. If you accumulate enough, the expense of a baler may pay off in the end.

Add a filtration system

Stop the expense of disposable water bottles. Buy a filter and make the one-time purchase of sturdy, company-Logo, reusable bottles.

Reduce garbage collection

Adding a recycling bin can cut your garbage collection in half. Since waste haulers pay to dispose of garbage, but not recyclables, those savings can be passed on to you.

Reduce wasteful purchases

Assess your purchases - is there something that is unnecessary? Cut the excess and save the money!

Go paperless

Save nearly \$1,000 a year on paper and ink by foregoing the print option.
