

The Salt Lake County Recycling Office is possible through the support of the Salt Lake Valley Solid Waste Management Council and the Salt Lake Valley Landfill

You may not realize it, but every time you put your bottles, cans and newspaper in the blue bin, you're starting a new cycle. These materials can be broken down, remade and reused again and again and again.

Curbside recycling is available to all county residents, and by keeping just the basic paper, plastic and metal out of the trash, save 65% of space in our landfill.

Did You Know?

-  SIX jobs are created in the recycling industry for every one job in the landfill industry.
-  Everyday, enough recyclable material is thrown in the landfill to equal the weight of over 900 cars.
-  The landfill collects TIRES, REFRIGERATORS, SCRAP METAL & CARPET PAD for recycling and hosts a HOUSEHOLD HAZARDOUS WASTE facility.
-  As of 2015, SLCounty's recycling rate is just 22%, while the national average is about 36%.
-  In 2015, the landfill recycled enough green waste to fertilize 64 football fields.
-  In 2015, the SLCounty Recycling office educated nearly 20,000 residents via tours, presentations, and events last year.

You can recycle too! Call us with any questions at 385.468.6370

20% Challenge

When it comes to recycling, Utah is behind the game.

In 2014, Mayor Ben McAdams challenged SLCounty residents to increase their recycling by 20% to catch up to the national average.

In two years, we were able to increase our recycling rate by 6% to our current rate of 22%! The challenge is not over, we are still gunning for the national average of 36%!

Mayor McAdams taking the 20% Challenge!

Are you up to the Challenge?

Pledge now and automatically be entered to win one of our cool prizes!
