

SALT LAKE COUNTY GIS

GIS Steering Committee

Did you know that the GIS Steering Committee oversees all GIS-related policies and decisions in Salt Lake County? This group is lead by the committee chair County Surveyor Reid Demman P.L.S., and is comprised of elected officials, administrative leaders, and other department decision makers. The purpose of the GIS Steering Committee is to “facilitate cooperation and efficiency within Salt Lake County government by promoting development, acquisition and dissemination of GIS infrastructure, data, and services”.

The Charter adopted by the committee governs GIS activities in the County, you can read it in its entirety here <http://slcintranet.slcounty.org/gis/About/charter.html>. For more information visit the GIS Steering Committee web page at <http://slcintranet.slcounty.org/gis/>.

Next week: How do I contact the GIS Steering Committee?

Throughout the coming year the members of the GIS community will be providing more information about GIS through econnect.
