Salt Lake City, UT 84114-4575

Re: An Audit of the Key Controls of Magna Library

Dear Mayor McAdams:

We recently completed an analysis of the financial records of Magna Library in compliance with Utah Code Ann. § 17-19a-204. Our purpose was to verify the accuracy and completeness of selected financial records and to assess compliance with certain internal controls that we have identified as key to good financial management. We also sought to identify areas of material risk to determine whether we should commit more of our limited resources in further auditing or investigation. A report of our findings and recommendations is attached.

Our work was designed to provide reasonable but not absolute assurance that records were accurate and complete and that the system of internal controls was adequate. There may be inaccurate or incomplete financial records that were not selected for review. Further, there may also be instances of noncompliance in areas not examined.

We appreciate the time spent by the staff at Magna Library and the cooperation from Trish Hull, Library Manager, Rebecca Griffin, Circulation Desk Supervisor, and other assigned staff members for answering our questions, gathering the necessary documents and records, and allowing us access to Magna Library during our audit. The staff was friendly, courteous, and very helpful. We trust that the implementation of the recommendations will provide for more efficient operations and better safeguarded County assets. Please feel free to contact me with any questions.

Sincerely,

Gregory P. Hawkins
Salt Lake County Auditor

Objectives

Pursuant to § 17-19a-204, we analyzed the financial records and internal controls of Magna Library. Our purpose was to verify the accuracy and completeness of selected financial records and to assess compliance with certain internal controls that are key to good financial management. We also sought to identify areas of material risk.

Conclusion

The Magna Library has put into place several key controls for managing public funds. Most risks identified were minor and not expected to result in material loss. Deficiencies in internal controls for segregation of duties, cash receipting, and PCI compliance have a higher likelihood of being a liability to the County. A report of the last audit of Magna Library was released to the public in December 2013.

Findings and Recommendations

Finding # 1 - Individual accountability was not established for funds entrusted to each cashier.

Risk Level: Moderate

Countywide Policy #1062, "Management of Public Funds," Section 2.3.1 states:

"The County Agency's Fiscal Manager will ensure that individual accountability and effective security is established and maintained for funds entrusted to each Cashier."

A previous audit conducted in 2013 found that multiple cashiers used the same cash drawer. A retest showed that multiple cashiers continue to use the same cash drawer throughout the day without establishing individual accountability by properly closing out the cash drawer and verifying the accuracy of the funds entrusted to them.

When individual accountability is not established for funds entrusted to each cashier, overages and shortages cannot be assigned to a particular cashier. Also, cashiers may feel less responsible than they would if they were individually accountable for funds entrusted to them. Additionally, access by multiple cashiers to the same cash drawer increases the risk of funds being lost, stolen, or diverted for personal use.

Recommendation

We recommend that individual accountability be established for funds entrusted to each cashier.

Finding # 2 - Employees working as cashiers also prepared the deposit.

Risk Level: Moderate

Countywide Policy #1062, "Management of Public Funds," states in the introduction:

"In managing public funds, basic internal controls require a clear segregation of duties between persons having custody of funds and/or performing cashiering duties, and those having access to and maintaining accounting records related to those public funds. Segregating these functions protects the employees involved and mitigates the risk of theft, embezzlement, or misuse of public funds through fraudulent record keeping. Supervisory oversight enforces the separation of duties, creates an atmosphere of employee accountability, and strengthens the control environment."

Employees that performed cashiering duties also prepared the daily deposit.

When depositing duties are not segregated from cashiering duties, funds are at a greater risk of being lost, stolen, or diverted for personal use.

Recommendation

We recommend that the deposit be prepared by an employee who does not perform cashiering duties.

Finding # 3 - The cash drawer can be opened without an electronic record of the transaction.

Risk Level: Moderate

Countywide Policy #1062, "Management of Public Funds," Section 2.4.1 states:

"Each Agency shall acquire and maintain the systems and equipment necessary for the accurate receipting, recording, accounting, and safekeeping of public money."

The Library point-of-sale system allows cashiers to open the cash drawer without an electronic record of the transaction.

When a cash drawer can be opened without recording the transaction, accurate receipting, recording, accounting, or safekeeping of public money cannot be established.

Recommendation

We recommend that transactions conducted in the point-of-sale system result in an accurate receipting, recording, and accounting of public money.

Finding # 4 - Cash over/short logs were missing.

Risk Level: Low

Countywide Policy #1062, "Management of Public Funds," Section 5.3.1.3 states:

"The MPF Form 11 [Cash Over/Short Log], for each Cashier, shall be signed by the Cashier's immediate supervisor. The MPF Form 11 and the Monthly Report of Cash Receipts shall be retained by the Agency and archived according to County Records Management guidelines."

We examined 12 months of over/short log records from May 2013 to April 2014. We found that 4 over/short logs were missing for the months of December 2013, and February, March, and April of 2014.

When over/short logs are missing and not reviewed by a supervisor, overages and shortages may go unnoticed and needed remediation may not occur.

Recommendation

We recommend that all over/short logs be retained by the Agency and archived according to County Records Management guidelines.

Finding # 5 - An SAQ representing Library Services' compliance with PCI-DSS had not been completed and was not on file.

Risk Level: Low

Countywide Policy #1400-7, "Payment Card Industry Data Security Standard Policy," Section 3.0 states:

"Any County agency that accepts, processes, transmits or stores cardholder data using any County IT Resource or system shall comply with the Payment Card Industry Data Security Standard (PCI-DSS) in its entirety."

A previous audit conducted in 2013 found that an SAQ showing compliance with PCI-DSS had not been completed. A retest showed that an SAQ representing Library Services' compliance with PCI-DSS had still not been completed and was not on file.

When an agency is not compliant with PCI-DSS, there is an increased risk of cardholder data breaches, fines, and the inability to accept credit cards as payments.

Recommendation

We recommend that Library Services' management complete and sign an annual SAQ and that Magna Library keep a copy of the SAQ on file to show they are aware of and compliant with PCI-DSS requirements.

Additional Information

Background

The Magna Library is located at 2675 South 8950 West in Magna. The library offers a variety of amenities, including books, DVDs, music CDs and audio books. The library also offers computers with Internet access and word processing capabilities, as well as high speed wireless access, a large meeting room, and a small conference room. The Magna Library successfully accomplishes Salt Lake County Library Services' mission which is to make a positive difference in the lives of customers by responsively providing materials, information, and services at community libraries located throughout the Salt Lake Valley and/or via the Internet.

Scope

Our work included a formal examination of financial records related to the following key internal controls, to the degree applicable:

- Change fund
- Petty Cash and Imprest Accounts
- Cash Receipting
- Cash Depositing
- Credit / Debit Card
- Capital and Controlled Assets and Software Inventory
- Financial Computer Controls
- Purchasing Card Use
- Payroll Practices
- Accounts Receivable
- Accounts Payable
- Third Party Contracts

Our examination period covered up to twelve months ending April 30, 2014. In addition to reviewing financial records, we reviewed and examined current practices through observation. Sampling of daily cash deposits, where applicable, was performed to assess compliance with Countywide policy and standard business and internal control practices. Retesting of prior audit findings was also performed, where applicable.

Management response to findings in this report, when received, will be attached as Appendix A.

RE: Management Response to the Audit of the Key Controls of Salt
Lake County Magna Library

Dear Mr. Hawkins:

This letter is submitted pursuant to the audit report of the Salt Lake
County Magna Library. We'd like to thank Deputy Auditor Leonardo
Flores for planning and completing the audit in accordance with Utah
Code Ann. §17-19a-204.

As reflected in our responses, we are determined to strengthening our
internal financial controls and reasonably implement the audit
recommendations.

If you have any questions or need any additional information, please feel
free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read 'Cooper', with a long horizontal stroke extending to the right.

**Salt Lake County Magna Library
Management Response to the Audit Findings**

Salt Lake County Library management is ultimately responsible for implementing internal controls to protect assets. Information and to ensure policy objectives are achieved. The Magna Library conforms to the County policies and procedures as directed by the Library Management. All policies and procedures are implemented system-wide with few exceptions.

Finding # 1 - Individual accountability was not established for funds entrusted to each cashier.

Risk Level: Moderate

Recommendation

We recommend that individual accountability be established for funds entrusted to each cashier.

Management Response:

The library staff is cross-trained in different areas of library operations to better utilize their time and to provide better customer service. It would not be cost-effective for the library to assign a dedicated cashier to each cash register due to low volume and low monetary value of transactions. The Library Management will look into the practicability of implementing a mid-day cash count which would help in establishing cashier accountability.

Finding # 2 - Employees working as cashiers also prepared the deposit.

Risk Level: Moderate

Recommendation:

We recommend that the deposit be prepared by an employee who does not perform cashiering duties.

Management Response:

Utmost effort is made to separate closing cashiers from the opening responsibilities or preparing deposits. However, due to limited staffing resources and scheduling conflicts this is not always feasible. Preparing deposits is primarily the responsibility of the Library Circulation Supervisor and Assistant Supervisor. The library believes that sufficient compensating controls are in place to mitigate any risks to public funds.

Finding # 3 - The cash drawer can be opened without an electronic record of the transaction.

Risk Level: Moderate

Recommendation

We recommend that all transactions conducted on the point-of-sale system result in an accurate receipting, recording, and accounting of public money.

Management Response:

The library's Point of Sale software has a built in feature that allows for the cash drawer to be opened without a transactions record. The library staff has been instructed to stop using this feature. The software company has been notified and a fix is expected in a future software release.

Finding # 4 - Cash over/short logs were missing.

Risk Level: Low

Recommendation

We recommend that all over/short logs be retained by the Agency and archived according to County Records Management guidelines.

Management Response:

The Circulation Supervisor and the Library Manager ensure over/short logs are reviewed and signed on a monthly basis. At the time of the audit the Library Manager was using the signed over/shot logs to complete the library monthly report and she was unaware the auditor needed the reports. The Library is archiving these records according to County Policy.

Finding # 5- An SAQ representing Library Services' compliance with PCI-DSS had not been completed and was not on file.

Risk Level: Low

Recommendation:

We recommend that Library Services' management complete and sign an annual SAQ and that Magna Library keep a copy of the SAQ on file to show they are aware of and compliant with PCI-DSS requirements.

Management Response:

Salt Lake County Library is currently seeking a system-wide PCI compliance. The Library is at 85% completion on SAQ-C certificate based on scanning data from a third party PCI scanning service. The Library is also working with the County Information Services to provided PCI Awareness training to library staff that handles credit card payments; training will be completed by staff by the end of August 2014.
