

## Quick Facts about the COVID-19 Vaccine

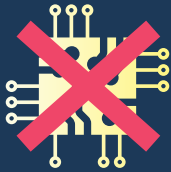

1

### It doesn't contain the coronavirus

You cannot get COVID-19 from the vaccine.

2

### It doesn't contain microchips

The vaccine DOES NOT contain microchips or tracking devices.

3

### Your DNA is safe

The COVID-19 vaccine doesn't change or interact with your DNA in any way.

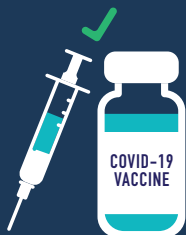

4

### The vaccine is safe and effective

Scientists around the world have worked on this for more than 10 years.

5

### If you have a chronic disease, it's even more important that you get vaccinated

If you have a chronic disease or condition, like diabetes, you are at higher risk of severe illness from COVID-19 and should get vaccinated.

Getting the COVID-19 vaccine will help keep you safe!
