COVID-19 Prevention for Workplaces and Businesses

- Workplaces and businesses must enforce social distancing of at least 6 feet between employees, or use teleworking wherever possible. The goal is to prevent one person's respiratory droplets from another person's immediate vicinity.

- Encourage frequent handwashing with soap and water.

- Provide hand sanitizer throughout the business.

- Exclude employees and patrons from the facility if they exhibit fever or respiratory symptoms of any kind.

- Sanitize frequently or commonly touched surfaces at least twice a day. This includes door knobs, light switches, hand railings, keyboards, telephones, computer mice, desks, tables, chair armrests, etc.

- We recommend handling payments remotely, either via app or over the phone. If payment in person is necessary, maintain 6 feet between people and wash hands after each transaction (for cash), or sanitize the customer point-of-sale keypad/device after each transaction.
