

Hansen Planetarium Historical Records

VI. Star Shows

Series: PL – 031. Show Scripts

Boxes: ST – 1 to ST – 5

This material is protected under copyright law. The scripts can be read, but no copies can be made (except for Planetarium staff).

Description: Scripts for the Hansen Planetarium star shows, laser shows, school shows, plays, concerts, and magic shows are included in this series. This series also contains public relations materials (brochures and posters) for individual shows.

Arrangement: The scripts were originally housed in one filing cabinet. One cubic foot box corresponds to one drawer in the original filing cabinet. Original file folder order was maintained. “Empty” written on a file folder indicates that the original file folder was labeled with a show title, but was empty.

The files in Box ST – 1 and Box ST – 3 were compiled by Fred Babcock, a member of the Hansen Planetarium staff. The first few years were recreations, with the files being created after the show had been completed. Some of the file folders contain only one or two items, which is all that Mr. Babcock could find on that particular show. (Information provided by Fred Babcock during discussion with project archivist, 18 May 2004).

Processing Note: The final (4) file folders in this series (File Folders 405 – 408) were not originally included with this series. The file folders contained show scripts that belonged with this series, but were transferred from another box.
