I. Administration

Series PL – 001. Hansen Planetarium Advisory Board Meetings - Transcribed and Taped

Boxes: AB – 1 to AB – 6

Researchers should not use the original tapes. Tapes should be copied, and the copies made available to the researcher.

Description: This collection contains meeting minutes (transcribed), 1983 – 2000, and taped meetings, 1989 to 1995.

The taped meetings are on audiocassette. A few contain no dates. The meetings taped are: Hansen Planetarium Advisory Board Meetings, sometimes called the Hansen Planetarium/Science Center Advisory Board Meetings.

Note: Five of the taped meetings are also represented in the transcribed Minutes.

Arrangement: The transcribed Minutes are arranged chronologically.

The taped Minutes on audiocassette are grouped together by meeting type, and then arranged chronologically within those groups (within each meeting). The finding aid (see below) provides access to the tapes.

Finding Aid: An inventory was created that lists the meeting and date of each tape. The finding aid shows the grouping of the tapes by meeting, and provides the number of the box that each tape is stored in.

Processing Note: Labeling on the audiocassettes represents the audio identification contained at the beginning of most of the tapes (providing meeting name and date). Some of the meetings were not identified, either on the label or at the beginning of the tape itself. During processing, the unidentified tapes were partially listened to, and the archivist provided a meeting name and date (when possible) according to the content of the tape.
