Series: PL – 003. Utah Science Center Task Force Meetings - Transcribed and Taped

Boxes: SC – 1 to SC – 5

**Researchers should not use the original tapes. Tapes should be copied, and the copies made available to the researcher.**

Description: This collection contains minutes of meetings both transcribed and taped, from various committees within the Utah Science Center Task Force, 1989 to 1995. A few of the audiocassettes are not dated. This task force was created to plan and implement plans to establish a Science Center in Utah. The Utah Science Center Task Force contained staff members of the Hansen Planetarium.

Also included in this series is presentation material related to the Science Center, located in box SC – 5.

Arrangement: The transcribed minutes are arranged chronologically. The taped minutes on audiocassette are grouped together by meeting type, and then arranged chronologically within those groups (within each meeting). The finding aid (see below) provides access to the tapes.

Finding Aid: An inventory was created that lists the meeting and date of each tape. The finding aid shows the grouping of the tapes by meeting, and provides the number of the box that each tape is stored in.

Processing Note: Labeling on the audiocassettes represents the original labeling on the tapes (providing meeting name and date). Some of the meetings were not identified, either on the label or at the beginning of the tape itself. During processing, the unidentified tapes were partially listened to, and the archivist provided a meeting name and date (when possible) according to the content of the tape. On the unidentified tapes, the name of the committee was not always provided and the label reflects this, leaving out the word “committee.”

Related Series:

- Hansen Planetarium Advisory Board Minutes, Series PL – 001, contains additional discussions regarding this Task Force.
