

BIG NUMBERS!

Who wants to be a millionaire?

If you received \$1000 per day, how many days would it take until you had \$1,000,000?

1000 days = 2.7 years

Who wants to be a billionaire?

If you received \$1000 per day, how many days would it take until you had \$1,000,000,000?

1,000,000 days = 2,738 years

So, if you began in 700 BC
and received \$1000 a day
from then until now, you would
barely have a billion dollars.

Astronomers estimate that our galaxy, the Milky Way, has over one hundred billion stars.

If you could catalog 1000 stars a day for 2700 years, you would only have cataloged 1% of the stars in our galaxy.
