

2018 SLCo Resilience Conference

“Municipal Governments & General Public”

TRACK B

Track B is designed specifically for small municipalities that need to create their Emergency Operations Plans (EOP).

Participants will receive a copy of the FEMA EOP templates and will walk through the process of creating a FEMA compliant plan for their community. If participants with existing Emergency Operations Plans bring a copy of their plan to the workshop, those plans will also be reviewed, and updates will be recommended.

The course will include four sessions taught by Capt. Keith Bevan of the Unified Fire Authority (UFA). Captain Bevan has more than 32 years of fire and emergency management experience. He also serves as a member of FEMA's Urban Search and Rescue team and is the Planning Section Chief for the National Incident Support Management Team.
