

SALT LAKE COUNTY GIS

Year of GIS—Coming Attractions

Over the last several weeks our goal was to introduce Salt Lake County's **Geographic Information Systems (GIS)** by highlighting the following:

- Give basic information about GIS.
- Outline some of the resources that are available.
- Describe the organizational structure of GIS within Salt Lake County.

Throughout the year various Salt Lake County Organizations will be providing more information about how they make use of this technology. This will include discussions of tools that have been developed and are in use, and the data various Salt Lake County entities have created.

To get more information on how to get started with GIS contact:

- Information Services 385-468-0700
- Surveyor's Office 385-468-8245
- Planning and Development Services 385-468-6700

Next week: Assessor's Office

Throughout the coming year the members of the GIS community will be providing more information about GIS through econnect.
